Triton Day 2023 Information Packet**

## **Packet Contents**

1. Major Flowchart
2. Major Requirement Course Descriptions
3. Additional Courses for Medical School
4. Frequently Asked Questions
  - I. Advanced Placement Course Information
  - II. Technical Elective (TE) Course Policy
  - III. 5 Year Bachelors/Masters Program
  - IV. Research Labs
5. Undergraduate Student Resources

## **The UCSD Department of Bioengineering**

### **Mission Statement**

To provide our students with an excellent education that enables successful, innovative, and lifelong careers in bioengineering industries and professions.

### **Student Learning Outcomes**

Upon completion of the Bioengineering Program, graduates in Bioengineering; Bioengineering: Biotechnology; Bioengineering: BioSystems; and Bioengineering: Bioinformatics are expected to have the desired knowledge, skills, attitudes, and behaviors as indicated below.

- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- An ability to communicate effectively with a range of audiences.
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.
- An ability to develop innovative thinking to solve bioengineering problems with creativity and entrepreneurship.

### **Academic Integrity and Research Ethics**

*The overall mission of the Dept. of Bioengineering is to provide students with an education that enables successful, innovative, and lifelong careers in bioengineering industries and professions, including a recognition of professional and social responsibilities, and sensitivity to ethical and health-related issues.*

The UCSD Policy on Academic Integrity states the general rules for student integrity. It establishes the standards that apply to academic course work undertaken by all undergraduate and graduate students of this University. The policy is based on the fundamental tenet that the principle of honesty must be upheld if the integrity of scholarship is to be maintained by an academic community.

## **Bioengineering Major Requirements**

(Note: All descriptions and prerequisites are from the 2022-23 Course Catalog.)

### **Freshman Year Courses:**

#### **Fall Quarter**

**MATH 20A. Calculus for Science and Engineering (4)** Foundations of differential and integral calculus of one variable. Functions, graphs, continuity, limits, derivative, tangent line. Applications with algebraic, exponential, logarithmic, and trigonometric functions. Introduction to the integral. (Two credits given if taken after MATH 1A/10A and no credit given if taken after MATH 1B/10B or MATH 1C/10C. Formerly numbered MATH 2A.)

**Prerequisites:** Math Placement Exam qualifying score, or AP Calculus AB score of 3 (or equivalent AB subscore on BC exam), or SAT II MATH 2C score of 650 or higher, or MATH 4C or MATH 10A.

**CHEM 6A. General Chemistry I (4)** First quarter of a three-quarter sequence intended for science and engineering majors. Topics include atomic theory, bonding, molecular geometry, stoichiometry, types of reactions, and thermochemistry. May not be taken for credit after CHEM 6AH. Recommended: proficiency in high school chemistry and/or physics. **Corequisite:** MATH 10A or 20A or prior enrollment.

**PHYS 2A. Physics—Mechanics (4)** A calculus-based science-engineering general physics course covering vectors, motion in one and two dimensions, Newton's first and second laws, work and energy, conservation of energy, linear momentum, collisions, rotational kinematics, rotational dynamics, equilibrium of rigid bodies, oscillations, gravitation. Students continuing to PHYS 2B/4B will also need MATH 20B. **Prerequisites:** MATH 10A-B or 20A or 20B or 20C or 31BH. Recommended preparation: prior or concurrent enrollment in MATH 20B.

#### **Winter Quarter**

**MATH 20B. Calculus for Science and Engineering (4)** Integral calculus of one variable and its applications, with exponential, logarithmic, hyperbolic, and trigonometric functions. Methods of integration. Infinite series. Polar coordinates in the plane and complex exponentials. (Two units of credits given if taken after MATH 1B/10B or MATH 1C/10C.) **Prerequisites:** AP Calculus AB score of 4 or 5, or AP Calculus BC score of 3, or MATH 20A with a grade of C– or better, or MATH 10B with a grade of C– or better, or MATH 10C with a grade of C– or better.

**BENG 1. Introduction to Bioengineering (2)** An introduction to bioengineering that includes lectures and hands-on laboratory for design projects. The principles of problem definition, engineering inventiveness, team design, prototyping, and testing, as well as information access, engineering standards, communication, ethics, and social responsibility will be emphasized. P/NP grades only. **Prerequisites:** none. (W)

**CHEM 6B. General Chemistry II (4)** Second quarter of a three-quarter sequence intended for science and engineering majors. Topics include gases, liquids, and solids, thermochemistry and thermodynamics, physical and chemical equilibria, solubility. May not be taken for credit after CHEM 6BH. **Prerequisites:** CHEM 6A or 6AH and MATH 10A or 20A. Recommended: concurrent or prior enrollment in MATH 10B or 20B.

#### **Spring Quarter**

**MATH 20C. Calculus and Analytic Geometry for Science and Engineering (4)** Vector geometry, vector functions and their derivatives. Partial differentiation. Maxima and minima. Double integration. (Two units of credit given if taken after MATH 10C. Credit not offered for both MATH 20C and 31BH. Formerly numbered MATH 21C.) **Prerequisites:** AP Calculus BC score of 4 or 5, or MATH 20B with a grade of C– or better.

**BILD 1. The Cell (4)** An introduction to cellular structure and function, to biological molecules, bioenergetics, to the genetics of both prokaryotic and eukaryotic organisms, and to the elements of molecular biology. **Recommended preparation:** prior completion of high school- or college-level chemistry course.

**PHYS 2B. Physics—Electricity and Magnetism (4)** Continuation of PHYS 2A covering charge and matter, the electric field, Gauss's law, electric potential, capacitors and dielectrics, current and resistance, electromotive force and circuits, the magnetic field, Ampere's law, Faraday's law, inductance, electromagnetic oscillations, alternating currents and Maxwell's equations. Students continuing to PHYS 2C will also need MATH 20C or 31BH.

**Prerequisites:** PHYS 2A or 4A and MATH 20B or 20C or 31BH. Recommended preparation: prior or concurrent

enrollment in MATH 20C or 31BH.

**PHYS 2BL. Physics Laboratory—Mechanics (2)** Experiments include gravitational force, linear and rotational motion, conservation of energy and momentum, collisions, oscillations and springs, gyroscopes. Data reduction and error analysis are required for written laboratory reports. One hour lecture and three hours laboratory. **Prerequisites:** PHYS 2A or 4A. Recommended preparation: prior or concurrent enrollment in PHYS 2B or 4C.

### **Sophomore Year Courses**

#### **Fall Quarter**

**MATH 20D. Introduction to Differential Equations (4)** Ordinary differential equations: exact, separable, and linear; constant coefficients, undetermined coefficients, variations of parameters. Systems. Series solutions. Laplace transforms. Techniques for engineering sciences. Computing symbolic and graphical solutions using MATLAB. (Formerly numbered MATH 21D.) May be taken as repeat credit for MATH 21D. **Prerequisites:** MATH 20C (or MATH 21C) or MATH 31BH with a grade of C– or better.

**PHYS 2C. Physics—Fluids, Waves, Thermodynamics, and Optics (4)** Continuation of PHYS 2B covering fluid mechanics, waves in elastic media, sound waves, temperature, heat and the first law of thermodynamics, kinetic theory of gases, entropy and the second law of thermodynamics, Maxwell's equations, electromagnetic waves, geometric optics, interference and diffraction. Students continuing to PHYS 2D will need MATH 20D.

**Prerequisites:** PHYS 2A or 4A, and MATH 20C or 31BH. Recommended preparation: prior or concurrent enrollment in MATH 20D. Prior completion of PHYS 2B is strongly recommended.

**PHYS 2CL. Physics Laboratory—Electricity and Magnetism (2)** Experiments on L-R-C circuits; oscillations, resonance and damping, measurement of magnetic fields. One hour lecture and three hours laboratory. Program or materials fee may apply. **Prerequisites:** PHYS 2A or 4A, and 2B or 4C. Recommended preparation: prior or concurrent enrollment in PHYS 2C or 4D.

**CHEM 7L. General Chemistry Laboratory (4)** Condenses a year of introductory training in analytical, inorganic, physical, and synthetic techniques into one intensive quarter. A materials fee is required. A mandatory safety exam must be passed. Students may not receive credit for both CHEM 7L and CHEM 7LM. **Prerequisites:** CHEM 6B or CHEM 6BH.

#### **Winter Quarter**

**MATH 18. Linear Algebra (4)** Matrix algebra, Gaussian elimination, determinants. Linear and affine subspaces, bases of Euclidean spaces. Eigenvalues and eigenvectors, quadratic forms, orthogonal matrices, diagonalization of symmetric matrices. Applications. Computing symbolic and graphical solutions using Matlab. Students may not receive credit for both MATH 18 and 31AH. **Prerequisites:** Math Placement Exam qualifying score, or AP Calculus AB score of 3 (or equivalent AB subscore on BC exam), or SAT II Math Level 2 score of 650 or higher, or MATH 4C, or MATH 10A, or MATH 20A. Students who have not completed listed **prerequisites** may enroll with consent of instructor.

**BENG 140A. Bioengineering Physiology (4)** Introductory mammalian physiology for bioengineering students, with emphasis on control mechanisms and engineering principles. Basic cell functions; biological control systems; muscle; neural; endocrine, and circulatory systems. Not intended for premedical bioengineering students. Credit not allowed for both BIPN 100 and BENG 140A. **Prerequisites:** CHEM 6A-B, PHYS 2A-B-C, BILD 1, or BENG 102; majors only or consent of department. (W)

**MAE 40. Linear Circuits (4)** Steady-state and dynamic behavior of linear, lumped-parameter electrical circuits. Kirchhoff's laws. RLC circuits. Node and mesh analysis. Operational amplifiers. Signal acquisition and conditioning. Electric motors. Design applications in engineering. **Prerequisites:** MATH 20D and MATH 31AH or MATH 18 or MATH 20F, and PHYS 2B.

**MAE 08. Matlab Programming for Engineering Analysis (4)** Computer programming in Matlab with elementary numerical analysis of engineering problems. Arithmetic and logical operations, arrays, graphical presentation of computations, symbolic mathematics, solutions of equations, and introduction to data structures. **Prerequisites:** MATH 20A and 20B or consent of instructor.

### Spring Quarter

**MAE 03. Introduction to Engineering Graphics and Design (4)** Introduction to design process through a hands-on design project performed in teams. Topics include problem identification, concept generation, project management, risk reduction. Engineering graphics and communication skills are introduced in the areas of: Computer-Aided Design (CAD), hand sketching, and technical communication. Program or materials fees may apply. **Prerequisites:** PHYS 2A or 4A. Enrollment restricted to BE 25, MC 25, MC 27, MC 29, and MC 30–34 majors only.

**BENG 100. Statistical Reasoning for Bioengineering Applications (4)** General introduction to probability and statistical analysis, applied to bioengineering design. Topics include preliminary data analysis, probabilistic models, experiment design, model fitting, goodness-of-fit analysis, and statistical inference/estimation. Written and software problems are provided for modeling and visualization. **Prerequisites:** BENG 1, MATH 18 or MATH 31AH or MATH 20F, MATH 20C or MATH 31BH, and MATH 20D, and PHYS 2A-B-C, or consent of department. (S)

**MATH 20E. Vector Calculus (4)** Change of variable in multiple integrals, Jacobian, Line integrals, Green's theorem. Vector fields, gradient fields, divergence, curl. Spherical/cylindrical coordinates. Taylor series in several variables. Surface integrals, Stoke's theorem. Gauss' theorem. Conservative fields. **Prerequisites:** MATH 18 or MATH 20F or MATH 31AH and MATH 20C (or MATH 21C) or MATH 31BH with a grade of C– or better.

**BENG 140B. Bioengineering Physiology (4)** Introductory mammalian physiology for bioengineering students, with emphasis on control mechanisms and engineering principles. Digestive, respiratory, renal, and reproductive systems; regulation of metabolism, and defense mechanisms. (Credit not allowed for both BIPN 102 and BENG 140B.) **Prerequisites:** BENG 140A; majors only or consent of instructor. (S)

### Junior Year Courses

#### Fall Quarter

**MAE 107. Computational Methods in Engineering (4)** Introduction to scientific computing and algorithms; iterative methods, systems of linear equations with applications; nonlinear algebraic equations; function interpolation and differentiation and optimal procedures; data fitting and least-squares; numerical solution of ordinary differential equations. **Prerequisites:** MAE 8 or 9, and MATH 18 or 20F or 31AH.

**BENG 110. Foundation of Biomechanics (4)** Statics, dynamics, and solid mechanics of hard and soft musculoskeletal tissues. Forces, moments, static equilibrium, kinematics, kinetics applied to human mechanics, and movement. Stress, strain, and material properties of musculoskeletal tissues. Problem solving and design in biomechanics. **Prerequisites:** MATH 20D, MATH 20E or MATH 31CH, MATH 18 or MATH 31AH; PHYS 2C, or consent of department. (F)

**MAE 170. Experimental Techniques (4)** Principles and practice of measurement and control and the design and conduct of experiments. Technical report writing. Lectures relate to dimensional analysis, error analysis, signal-to-noise problems, filtering, data acquisition and data reduction, as well as background of experiments and statistical analysis. Experiments relate to the use of electronic devices and sensors. **Prerequisites:** PHYS 2C or PHYS 4B and PHYS 2CL or MAE 40. Enrollment restricted to MC 25, MC 27, MC 29, CE 25, BE 25, BE 27.

#### Winter Quarter

**BENG 130. Biotechnology Thermodynamics and Kinetics (4)** An introduction to physical principles that govern biological matter and processes, with engineering examples. Thermodynamic principles, structural basis of life, molecular reactions and kinetics, and models to illustrate biological phenomena. **Prerequisites:** CHEM 6B, MATH 20A, 20B, 20D, PHYS 2A, 2B, 2C; majors only or consent of department. (W)

**BENG 112A. Soft Tissue Biomechanics (4)** Tensor analysis. Stress, strain, equilibrium, and constitutive law for soft biological tissues. Applications of solid mechanics to mammalian tissue physiology. Viscoelasticity. Finite elasticity. Problem solving and design in soft tissue biomechanics. **Prerequisites:** BENG 110 or consent of department. (W)

**BENG 186B. Principles of Bioinstrumentation Design (4)** Biophysical phenomena, transducers, and electronics as related to the design of biomedical instrumentation. Potentiometric and amperometric signals and amplifiers.

Biopotentials, membrane potentials, chemical sensors. Electrical safety. Mechanical transducers for displacement, force, and pressure. Temperature sensors. Flow sensors. Light-based instrumentation. **Prerequisites:** ECE 35 or MAE 140; ECE 45 or MAE 170; or consent of department. (W)

#### Spring Quarter

**BENG 187A. Bioengineering Design Project: Planning (1)** General engineering design topics including project planning and design objectives, background research, engineering needs assessment, technical design specifications, engineering standards, and design requirements and constraints. Introduction to biomedical and biotechnology design projects. Career and professional advising. Majors must enroll in the course for a letter grade in order to count the sequence toward the major. No exceptions will be approved. **Prerequisites:** BENG 112A or BENG 152 or BENG 168; bioengineering, bioengineering: biotechnology, or bioengineering: biosystems majors only or consent of department. (S)

**BENG 103B. Bioengineering Mass Transfer (4)** Mass transfer in solids, liquids, and gases with application to biological systems. Free and facilitated diffusion. Convective mass transfer. Diffusion-reaction phenomena. Active transport. Biological mass transfer coefficients. Steady and unsteady state. Flux-force relationships. (Credit not allowed for both CENG 101C and BENG 103B.) **Prerequisites:** CENG 101A or MAE 101A or BENG 112A, or consent of department. (S)

**BENG 112B. Fluid and Cell Biomechanics (4)** Fluid hydrostatics and flow dynamics. Flow kinematics and conservation laws applied to the circulation. Viscous biofluids. Biopolymers, cell mechanics, and mechanobiology. Problem solving and design in biofluid and cell mechanics. **Prerequisites:** BENG 112A or consent of department. (S)

**BENG 172. Bioengineering Laboratory (4)** A laboratory course demonstrating basic concepts of biomechanics, bioengineering design, and experimental procedures involving animal tissue. Sources of error and experimental limitations. Computer data acquisition, modeling, statistical analysis. Experiments on artery, muscle and heart mechanics, action potentials, viscoelasticity, electrocardiography, hemorheology. Course materials fees may apply. **Prerequisites:** MAE 170; junior or senior standing in the major or consent of instructor. (S)

#### Senior Year Courses

##### Fall Quarter

**BENG 187B. Bioengineering Design Project: Development (1)** Development of an original bioengineering design for solution of a problem in biology or medicine. Analysis of economic issues, manufacturing and quality assurance, ethics, safety, design constraints, government regulations, and patent requirements. Oral presentation and formal engineering reports. Career and professional advising. Majors must enroll in the course for a letter grade in order to count the sequence toward the major. No exceptions will be approved. **Prerequisites:** BENG 187A; concurrent enrollment in one of BENG 119A, BENG 126A, BENG 127A, BENG 128A, BENG 129A, BENG 139A, BENG 147A, BENG 148A, BENG 149A, BENG 169A, or BENG 179A; bioengineering, bioengineering: biotechnology, or bioengineering: biosystems majors only or consent of instructor. (F)

**MAE 150. Computer-Aided Design (4)** Computer-aided analysis and design. Design methodology, tolerance analysis, Monte Carlo analysis, kinematics and computer-aided design of linkages, numerical calculations of moments of inertia, design of cams and cam dynamics; finite element analysis, design using Pro-E, Mechanica Motion and Mechanical Structures. **Prerequisites:** MAE 30A or MAE 130A or SE 101A or BENG 110, MAE 107 or SE 121, MAE 3, and senior standing in engineering major, or consent of instructor.

**BENG 122A. Biosystems and Control (4)** Systems and control theory applied to bioengineering. Modeling, linearization, transfer functions, Laplace transforms, closed-loop systems, design and simulation of controllers. Dynamic behavior and controls of first and second order processes. PID controllers. Stability. Bode design. Features of biological controls systems. A simulation project using Matlab and an oral presentation are required. Credit not allowed for both ECE 101 and BENG 122A. **Prerequisites:** MAE 140 or BENG 134 or consent of department. (F)

##### Winter Quarter

**BENG 187C. Bioengineering Design Project: Implementation (1)** Approaches to implementation of senior design project, including final report. Teams will report on construction of prototypes, conduct of testing, collection of data,

and assessment of reliability and failure. Majors must enroll in the course for a letter grade in order to count the sequence toward the major. No exceptions will be approved. **Prerequisites:** BENG 187B; concurrent enrollment in one of the following lab sections: BENG 119B, BENG 126B, BENG 127B, BENG 128B, BENG 129B, BENG 139B, BENG 147B, BENG 148B, BENG 149B, BENG 169B, or BENG 179B; bioengineering, bioengineering: biotechnology, or bioengineering: biosystems majors only or consent of instructor. (W)

#### Spring Quarter

**BENG 187D. Bioengineering Design Project: Presentation (1)** Oral presentations of design projects, including design, development, and implementation strategies and results of prototype testing. Majors must enroll in the course for a letter grade in order to count the sequence toward the major. No exceptions will be approved.

**Prerequisites:** BENG 187C; bioengineering, bioengineering: biotechnology, or bioengineering: biosystems majors only or consent of instructor. (S)

**BENG 186A. Principles of Biomaterials Design (4)** Fundamentals of materials science as applied to bioengineering design. Natural and synthetic polymeric materials. Materials characterization and design. Wound repair, blood clotting, foreign body response, transplantation biology, biocompatibility of materials, tissue engineering. Artificial organs and medical devices. Government regulations. Patenting. Economic impact. Ethical issues. A term project and oral presentation are required. **Prerequisites:** BENG 112B or BENG 123, or consent of department. (S)

**BENG 125. Modeling and Computation in Bioengineering (4)** Computational modeling of molecular bioengineering phenomena: excitable cells, regulatory networks, and transport. Application of ordinary, stochastic, and partial differential equations. Introduction to data analysis techniques: power spectra, wavelets, and nonlinear time series analysis. **Prerequisites:** BENG 122A or BENG 123 or consent of department. (S)

**\*BENG 191/291. Senior Seminar I: Professional Issues in Bioengineering (2)** (Conjoined with BENG 291.) Instills skills for personal and organizational development during lifelong learning. Student prepares portfolio of personal attributes and experiences, prepares for career interviews plus oral report of interviewing organizational CEO. Graduate students will prepare a NIH small business research grant. **Prerequisites:** consent of instructor. (F)

**Two (“A” & “B”) Design Elective Courses (6 units total)** - Seniors work in teams on a project to design a solution to a multidisciplinary bioengineering problem suggested by professionals in bioengineering industry, academia, or medicine. Taken Fall and Winter quarter of Senior Year.

#### **\*\*Two 4-unit Technical Elective courses**

Required for all students

*\*Recommended but not required; may be taken once.*

*\*\*See departmental Student Affairs Office for additional information.*

## **Additional Courses for Medical School**

Bioengineering students planning to apply to med school take the following courses in addition major requirements:

1. BILD 2
2. BILD 3
3. CHEM 6C
4. CHEM 41A
5. CHEM 41B
6. CHEM 41C
7. CHEM 43A
8. One of the following: BIBC 100, BIBC 102, CHEM 114A, or CHEM 114B
9. One year of English composition or writing (general education courses dependent on written material for grading should suffice)
10. One course in psychology and sociology (PSYC 1 and SOCI 70) helpful for the MCAT but not a prerequisite
11. Recommended additional coursework
  - a. Genetics (BICD 100)
  - b. Cell biology (BICD 110)
  - c. Molecular Biology (BIMM 100)
  - d. Microbiology (BIMM 120)

Most medical schools accept some AP and IB credit for prerequisites. Some medical schools do NOT accept AP/IB credit for prerequisites, and additional upper division coursework may be required. Please consult with a pre-med advisor if you have concerns.

For more information, please visit:

<https://career.ucsd.edu/plan/explore/pre-health-med/medicine/prepare.html> and consider meeting with a pre-med advisor. This information is meant to guide students in planning for a pre-med track, but may not fully encompass all requirements.

## Frequently Asked Questions

1. I was not directly admitted into the Bioengineering department. Is there a way that I can change into any of the “capped” majors later on?

**Possibly.** Freshman students admitted in **FALL 2023** will be able to apply “**one time only**” to a “capped” major in **FALL 2024**. A certain number (*determined on an annual basis*) of “continuing” sophomore students who apply will be selected to enter the “capped” *Bioengineering*, *Bioengineering: Biotechnology*, *Bioengineering: Bioinformatics*, or the *Bioengineering: BioSystems* major. Interested continuing students must not be past sophomore standing, as time to graduation would be delayed. You are required to complete the following courses (depending on which major you wish to apply for) **prior** to applying in **FALL 2024**:

*Bioengineering and Bioengineering: Biotechnology*: BILD 1 (biology); CHEM 6AB; MAE 8 (MatLab); Math 20ABC; Physics 2AB.

*Bioengineering: Bioinformatics*: BILD 1; CHEM 6AB; CSE 11 (or CSE 8A and 8B); MATH 20ABC; PHYS 2AB.

*Bioengineering: BioSystems*: CHEM 6AB; MATH 20ABC; PHYS 2AB.

If you have met some of the courses by Advanced Placement (“AP”) work, please be advised of the following: A minimum of 3 courses listed must have been completed at UC San Diego. If students can not meet this 3-course minimum due to prior credit, students may offer grades for **MATH 20D** (Differential Equations), **MATH 18** (Linear Algebra) or **MATH 20E** (Vector Calculus) until the 3 course minimum has been met.

Applications will be available **September 23, 2024**, and must be submitted by Friday of the second week of instruction- **Oct. 4, 2024**. Applications will be ranked according to the GPA obtained in the required courses and will be approved, starting with the student having the highest GPA in those courses, until the “open” slots are filled in each of the “capped” majors. Bioengineering Student Affairs staff will notify all applicants re: their status on **Wednesday, Oct 9th, 2024**.

2. What are the differences among the four majors within the Bioengineering Dept?

***Bioengineering (BENG)***: This major prepares students for careers in the biomedical device industry and for further education in graduate school. Students completing the B.S. degree in Bioengineering have a broad preparation in traditional topics in engineering, allowing for a variety of career pathways. This program addresses the bioengineering topics of biomechanics, biotransport, bioinstrumentation, bioelectricity, biosystems, and biomaterials, and the complementary fields of systems and integrative physiology. Education in these areas allows application of bioengineering and other scientific principles to benefit human health by advancing methods for effective diagnosis and treatment of disease, e.g., through development of medical devices and technologies. The *BENG* major is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering & Technology [EAC/ABET].

***Bioengineering: Biotechnology (BTEC)***: This major prepares students for careers in the biotechnology industry and for further education in graduate school. The curriculum has a strong engineering foundation with emphasis on biochemical process applications. This program addresses the bioengineering topics of biochemistry, metabolism, kinetics, biotransport, biosystems, bioreactors, bioseparations, tissue engineering, and the complementary fields of cellular physiology. Education in these areas allows application of bioengineering and physicochemical principles to cellular and molecular biology, with the applications that benefit human health. The *BTEC* major is accredited by [EAC/ABET].

***Bioengineering: Bioinformatics (BINF)***: Bioinformatics is the study of the flow of information (genetic, metabolic, and regulatory) in living systems to provide an understanding of the properties of

cells and organisms. This major has been developed by the Departments of Bioengineering, Chemistry and Biochemistry, Computer Science and Engineering, and Division of Biology. The bioinformatics major in bioengineering emphasizes systems engineering and model-based approaches to interpreting and integrating bioinformatics data. The bioinformatics major prepares students for careers in the pharmaceutical, biotechnology, and biomedical software industries, and for further studies in graduate school. The *BINF* major is not accredited by a Commission of [EAC/ABET].

***Bioengineering: BioSystems (BSYS):*** This major focuses on the interaction and integration of components in complex biological and engineering assemblages, and how the function and interactions of these components affect overall performance. The major draws on foundations of classical electrical and systems engineering, with biological applications at levels of the molecular and cellular to the physiological and whole organism, and provides an alternative to other bioengineering majors that emphasize mechanical, chemical, and computational approaches. The major prepares students for careers in the bioengineering industry, in research and development, and for further education in graduate, medical, and business schools. The *BSYS* major is accredited to a [EAC/ABET].

**3. I have received Advanced Placement credit from high school in one or more subjects. Does AP work exempt me from taking specific courses?**

**Yes.** Depending upon the score you receive on an AP exam, you may be exempt from taking one or more courses required for your major. Please refer to section I below and/or the online [UCSD General Catalog](#).

**4. Is it possible to do research as an undergraduate?**

**Yes.** As a student with lower-division standing, upon completion of 30 UCSD units with a 3.0 GPA, you may request to work with a faculty member and enroll in a BENG 99 (Independent Study for Undergraduates) course. Additionally, when you achieve upper-division standing and have completed a total of 90 units with a 2.5 GPA, you are encouraged to participate in research with a faculty member by enrolling in a BENG 199 course. Please refer to the Research Labs listing to see an up to date list of our faculty who you may have the option of doing research with.

**5. Can I graduate in four years with a major in the Bioengineering Department?**

**Yes.** Our department's major flowcharts are designed to be completed in four years.

**6. Is it possible to complete a minor or double major with a major in Bioengineering?**

Completion of a minor or a double major is not encouraged among the engineering departments. Engineering majors are very rigorous and require a large number of units to be completed. Often a student's graduation will be delayed if a minor or double major is planned. Students may not complete a minor or double major with another engineering department, per University policy.

**7. How many students are in the Bioengineering Dept?**

Approximately 535 undergraduate students across 4 majors.

**8. Does Bioengineering have a 5-Year BS/MS Program?**

**Yes.** Please reference section III below.

## I. Advanced Placement Course Information

Exam and Units for University Credit	UCSD Course Exemptions for Use in Satisfying Bioengineering Major Requirements
<u>Biology</u> ~ 8 units	Score of 3 = BILD 10; may take BILD 1, 2, 3 for credit Score of 4 or 5 = exempts from BILD 1, 2, 3
<u>Chemistry</u> ~ 8 units	Score of 3 = exempts Chem. 4 Score of 4 = exempts Chem. 4 or 11; may take Chem. 6A, 6B, 6C for credit Score of 5 = exempt from Chem. 6A-B-C; may take Chem. 6AH, 6BH, 6CH for credit. <b><u>MUST TAKE CHEM 7L.</u></b>
<u>Math</u> : Calculus AB ~ 4 units	AB: Score of 3 on AB exam = exempts Math 10A AB: Score of 4 or 5 = exempts Math 20A
<u>Math</u> : Calculus BC ~ 8 units (8-unit max for both tests)	BC: Score of 3 on BC exam = exempts Math 20A BC: Score of 4 or 5 on BC exam = exempts Math 20A and 20B
<u>Physics</u> : Physics 1 or 2  Physics C: Mechanics ~ 4 units  Physics C: Electricity and Magnetism ~ 4 units (8-unit max for all 3 tests)	1 or 2 exam = elective credit and exempt Phys. 10  C exam (Mech.) score of 3= exempt Phys. 1A C exam (Mech.) score of 4 or 5= exempt Phys 1A or 2A  C exam (E&M) score of 3= exempt Phys. 1B C exam (E&M) score of 4 or 5= exempt Phys 1B or 2B

## II. Technical Elective (TE) Course Policy

All Bioengineering majors must complete 8 units of technical elective credit to satisfy their major requirements. The number of units that must have “engineering” as the primary component depends on the major, as listed below.

MAJOR	Total # of TE Units Required	Minimum # of TE Units with Engineering Content Required
BENG	8	4 units
BTEC	8	6 units
BINF	8	8 units
BSYS	8	8 units

Courses that have “engineering” as its primary component, and are normally approved, include most 4-unit, upper-division (100 series) courses taken for a letter grade, not required for the major and taught in one of the departments of the Jacobs School of Engineering. ALL proposed technical electives must be approved by the Bioengineering Student Affairs office prior to enrollment in the course to verify technical elective credit.

Any portion of the TE requirement not fulfilled by “engineering” courses must be fulfilled by “science” courses. Courses that have “science” as its primary component and are normally approved are 4-unit, upper-division (100 series) courses taken for a letter grade, not required for the major and taught in the departments of Biological Sciences, Chemistry/Biochemistry, or Physics. Courses having a lab component are acceptable.

**BENG 199, *Independent Study Research*** courses may also be used toward satisfaction of the TE requirement. Students interested in doing research via BENG 199 courses must enroll with the same faculty member in two quarters of BENG 199. Doing so will satisfy both the TE course requirement and the required engineering component.

**“Teams in Engineering Sciences” (TIES)** courses may also be used to satisfy the TE requirement for all departmental majors. The ENG 100D and ENG 100L courses are considered as “engineering”-type TE courses. Students will receive 8 units of TE credit after passing 1 quarter of ENG 100D (4 units) taken concurrently with ENG 100L (2 units), and passing 1 additional quarter of ENG 100L (2 units each), thus satisfying the TE course requirements for the major.

**BENG 196** may be used to fulfill 4 units of technical elective requirements for all majors. Please see the Student Affairs office for instructions on enrolling in this course. **BENG 197 or BENG 198** courses may not be used to satisfy TE requirements in any majors in the Department of Bioengineering.

### III. 5 Year Bachelors/Masters Degree

The Department of Bioengineering (BENG) offers a five-year process leading to Bachelor of Science and Master of Science degrees in Bioengineering. It is available to undergraduate students who are enrolled in any of the major programs offered by BENG. The purpose of the BS/MS is to allow interested students to obtain the MS degree within one year following completion of the BS degree. **The program is open only to UCSD undergraduates and is only for the MS degree, not the M.Eng degree.** Application to this program is a two-step process.

#### **Program Information**

Twelve units of Bioengineering graduate level courses must be completed during the student's senior undergraduate year, *in addition* to the requirements for the bachelor's degree.

- These twelve units will count toward the requirements for the master's degree **only** and must be taken for a letter grade. The student *may* take up to six graduate level courses during their senior year; six is the maximum that can be transferred per OGS requirements.

The student will arrange a schedule of courses for the senior year that will fulfill the requirements for the BS degree while also serving the program planned for the MS degree. Students are expected to meet the requirements for the MS degree in one year (three consecutive academic quarters) from the date of the receipt of the BS degree.

- Students are encouraged to meet with the Undergraduate and Graduate Coordinators to plan the undergraduate and graduate courses to be taken during the senior year. *Enrollment in graduate level courses is done manually and requires authorization from the Graduate Coordinator.*

#### **Admission Requirements**

To be eligible, students must have completed the first two quarters of their junior year in residence at UCSD and have an upper-division GPA of 3.5 or better. However, it should be noted that meeting and even exceeding minimum requirements does not *guarantee* admission. **Students taking a fifth year of undergraduate study are not eligible.**
